

Equipaddock

A very flexible grazing and cutting ley ideal for use by horses and ponies

Equipaddock is a very flexible grazing and cutting grass (ley) mixture, ideal for for both horses and ponies.

The mixture contains a combination three ryegrasses, Timothy, Red Fescue and Smooth Stalked Meadow Grass. These creeping grass varieties ensure that Equipaddock repairs itself wherever heavy treading and close grazing occurs.

Equipaddock forms a pasture with a dense sward that can produce good yields of high quality horse hay. As a result, it is available to use on gallop areas which are suffering with hard wear and tear.

This mixture is very responsive to nitrogen fertiliser, bolstering yields of forage for hay and assisting with recovery after cutting.

Equipaddock grass mixture is available in a standard 10kg pack. It is a slightly modified mixture to the standard [Horse Hay](#) mixture.

Our Equipaddock mixture is provided in a handy 10kg pack. As well as new leys, it is also suitable for re-seeding a small area.

Strengths

- The 'creeping' natures of the fescue and meadow grasses ensure that this ley will 'repair' itself where heavy treading or close grazing have occurred
- Can be readily used on gallop areas where hard wear and dense cover are essential
- Very responsive to moderate use of nitrogen fertiliser that will enhance yields of forage for hay and assist with recovery after cutting
