

Equipaddock

A very flexible grazing and cutting ley ideal for use by horses and ponies

The combination of three ryegrasses, Timothy, Red Fescue and Smooth Stalked Meadow Grass help form a pasture with a dense sward that is very capable of producing good yields of high quality horse hay.

Our Equipaddock mixture is available in a standard 10kg pack. A slightly amended mixture to our standard [Horse Hay](#), this handy pack enables you to reseed areas.

Strengths

- The 'creeping' natures of the fescue and meadow grasses ensure that this ley will 'repair' itself where heavy treading or close grazing have occurred
- Can be readily used on gallop areas where hard wear and dense cover are essential
- Very responsive to moderate use of nitrogen fertiliser that will enhance yields of forage for hay and assist with recovery after cutting
