

# Red Circle

**A very high yielding, long term, top quality grazing mixture**

**Red Circle is a very high yielding, long term, top quality grazing mixture that gives quality silage if required. Suitable for all livestock.**

Very high quality is achieved by using a carefully selected blend of late heading perennial ryegrasses, clovers and Timothy which have a high D value combined with high levels of sugar, minerals and protein content. Red Circle will also retain its quality when left to bulk up because it contains high D value pasture perennials which do not produce early seed heads.

*(Red Circle is available without seed treatments and with organically produced constituents please contact us for more details)*

For quantities of 30 or more acres, please contact us on 01472 371661

## Strengths

- Good Early Spring Growth
- Very High Quality
- Adaptable
- Long Lasting
- Easy to Manage
- Extended Grazing
- Excellent Animal Performance
- Excellent Palatability
